

ZIRKON EV1120

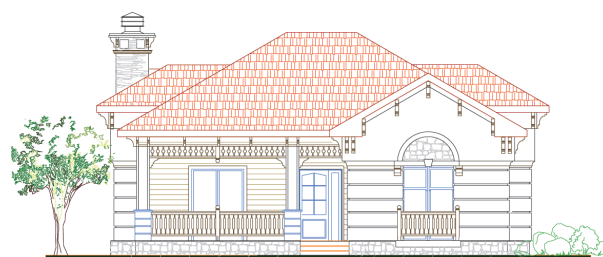

How big is the size of the house?

It depends on you. Fuga Steel technology can be used for different sizes from a 40 m2 garden house to a 600 m2 villa. It is possible to manufacture any type of design with the Light-gauge Steel Building System. Either modern or traditional, all dwellings can be constructed elegantly with this system. Local features and preferences can easily be reflected on these buildings. Dwellings can be designed as detached, semi-detached or terraced houses.
